SUMMARY

Highly adaptable Full Stack Software Engineer with over 6 years of hands-on experience in designing, developing, and deploying cutting-edge software solutions. Proficient in both front-end and back-end technologies, I have a track record of delivering robust, scalable, and user-friendly applications that meet and exceed client expectations.

EXPERIENCE

01/2023 - Present

Lagos, Nigeria

Full Stack Developer
QuickCheck

- Promoted within the first 8 months for outstanding performance in delivering quality code.
- Implemented 3 data-driven features, which increased customer engagement by up to 23% and attracted over 400 new users within six (6) weeks of deployment.
- Refactored and optimized several legacy endpoints, which reduced API response time by up to 800ms.
- Re-engineered and refactored ES5 JS code to TypeScript to meet modern standards, leading to significant reduction in bundle size and optimized performance.

03/2022 - 01/2023

New York, USA

Full Stack Developer
LunchBox

- Reduced daily data processing time by 77% by implementing stored procedures in the web portal used nationwide
- Demonstrated expertise in translating the client's specific needs from Figma designs into easy-to-use software solutions
- Contributed to the documentation of supported systems to help train new and existing team members.
- Collaborating and assisting team members to ensure prompt delivery of projects, which has resulted in the successful launch of three projects within the specified timeline.
- Developed a web application that allows customers to order food online, which eliminates third-party fees and is projected to increase revenue by 15 - 20%

09/2020 - 03/2022

Lagos Nigeria

Senior Full Stack Developer
LifeBank

- Developed and introduced an in-house CRM platform that enhanced user onboarding processes, resulting in a 20% reduction in onboarding time and increased efficiency when handling customer complaints.
- Revamped the company's website, leading to higher conversion rates by 3% margin.
- Engineered software for dispatch riders that measures rider metrics such as delivery time, fulfilment rate and others, leading to higher order fulfilment rates by up to 20%.

11/2019 - 09/2020

Lagos, Nigeria

Full Stack Developer
IPI Solutions Nigeria Limited

- Developed a range of customizable web components, known as webparts, using React and TypeScript within Microsoft SharePoint for our consumer-facing application. These webparts successfully reduced page loading times by more than a minute.
- Reviewed and improved code maintainability, and enhanced the various aspects of the app's features to optimize overall reliability, efficiency and performance of the application.
- Enhanced the seamless integration of company listings/products with external RESTFUL API services like Facebook, Power BI, and Microsoft Outlook. This integration added significant value to our customers, resulting in revenue exceeding $5,000.

EDUCATION

BS in Computer and Information Sciences
Monash University

TECH STACK

Front-End Technology

HTML5   CSS3   SCSS   React   React Native   Angular   JavaScript   Redux

Back-End Technology

Python   Django   NodeJS   Express   Nodejs   SQL   Mongoose

STRENGTHS

Attention to Detail

Can spot tiny errors in massive code database, prioritize accuracy in front-end web development.

Experienced in conducting code reviews, and able to spot potential runtime errors by analyzing underlying code structure to implement accurate solutions.

Recently spotted a potential error in a bug fix implementation during a code review session, which would have blocked users from placing requests, thus preventing income acquisition by the organization.

Goal Oriented

Proficient in setting milestone achievements and targets, and implementing strategic steps which ultimately result in the accomplishment of the set objectives.

Leadership

Able to inspire and organize teams towards achieving a set target effectively within a provided timeframe.

Led a team of junior developers to the successful timely execution of a high priority project, which improved noteriety for the organization.
